TRU&MODERN[®] COLLECTION

EXCEPTIONAL DOORS FOR THE MODERN INTERIOR

Creating a modern home is one of the most exacting architectural styles to achieve. When distilling a home to its simplest form, doors play a critical role in the interior design. We created our Tru&Modern® Collection with this in mind.

From simple to bold, we offer the broadest line of made-to-order, handcrafted, modern doors so you can capture your exact vision.

FLUSH CONSTRUCTED DOORS

Flush Doors

TRU&MODERN® FLUSH (TMF SERIES)

All other flush doors just don't deliver the refinement required for today's modern interior. TruStile flush wood doors feature 1/16" thick hand-selected veneers, precision-matched to optimize the beautiful character found across each species of natural wood.

- Hand-matched 1/16" veneers are available in both horizontal and vertical grain (wood doors only)
- A highly engineered core provides stability for the door, while a matching hardwood edge provides a beautiful finish
- Made to order in sizes up to 4' x 10'
- Available in stain-grade wood or paint-grade MDF

Flush Door Styles

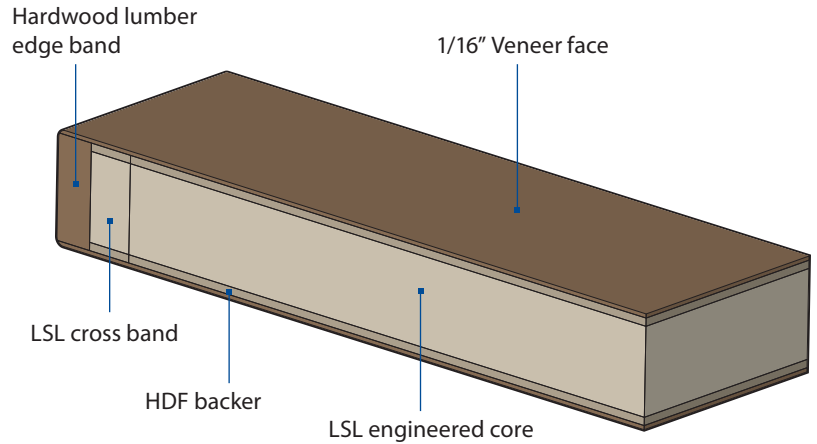

Detailed information on TruStile flush doors is available in our *Flush Door Specification Guide*. Download for free: www.trustile.com/flush-guide

*MDF doors have no grain and are not directional

TruStile Reserve® Wood Flush Doors

- Hand-matched 1/16" veneers are available in both horizontal and vertical grain
- A highly engineered core provides stability for the door while the matching hardwood edge provides a beautiful finish
- Made to order in sizes up to 4' x 10'
- Available in over stain-grade wood or paint-grade MDF

TMF1000 flush door in plain sawn white oak with Grey Mist finish

Hand-Matched Pairs

When hand-matching veneers for pairs, TruStile treats the pattern as though it was covering one extra-wide door. This creates a continuous grain pattern across the width of both doors.

On horizontal pairs, wood grain is continuous across the face of both doors.

Sketch Face Flush Doors

TruStile offers two sketch face door styles that combine hand-matched vertical and horizontal veneers on the same face.

STILE & RAIL CONSTRUCTED DOORS

TruStile's authentic stile and rail doors offer crisp details and design flexibility, which can't be replicated in routed or stamped doors. Each door is made to order with perfectly proportioned components, individually crafted to ensure every door is architecturally correct, regardless of size.

All Doors Are Not Created Equal

The figure illustrates the timeless advantage of TruStile's authentic stile and rail construction. All door components can be customized and combined to create the door style you desire, each with crisp, architecturally-correct details.

TS1000 doors in MDF with Empire (EM) moulding and Flat (C) panel

TruStile MDF Doors

TruStile MDF Doors provide quality that is unrivaled. Our use of super-refined MDF and meticulous construction methods result in a painted door product that is a cut above the rest.

- Made to order and built to any size and style.
- Built with genuine stile and rail construction — never routed or stamped with poplar Wedge Edge® provides a secure mount for hardware.
- Made with solid, super-refined MDF that provides a smoother painting surface than pine, poplar or lower-grade MDF alternatives.
- Engineered for maximum stability and durability — won't shrink, expand or warp when exposed to environment.
- More affordable than wood doors.

What is MDF

MDF is an engineered wood product made from compressed wood fibers bound together with resin. The durable and homogeneous construction of MDF resists warping, cracking and splitting and outperforms natural wood doors for painted applications.

TS2020 doors in walnut with clear coat finish, Square Stick (SS) sticking and white lami glass

TruStile Reserve® Wood Doors

- Made to order and built to any size and style.
- Incorporates only the finest materials and methods. We have developed a proprietary specification based on the AWI (Architectural Woodwork Institute) standard for AA Premium Grade doors.
- Engineered panels are made with a composite core for strength and stability while maintaining the look of a solid wood panel construction.
- Precision-cut cope and stick joinery provides crisp miter joints.
- The strength and durability of LSL is employed for the ultimate in stiffness to resist bowing, twisting or warping.

TS1000 pocket doors in walnut with Cappuccino finish, Square Stick sticking and Flat (C) panel

TruStile Wood Doors

- Made to order and built to almost any size or style, using genuine stile and rail construction, industry-leading veneers and quality lumber.
- LSL cores and doweled assembly offers exceptional strength, durability, and maximum stability.
- Solid wood, edge-glued panels. When factory finished, panels are pre-stained on edges prior to assembly.
- A floating panel system uses flexible cushions to secure panels in place — preventing shifting and rattles, while allowing for expansion from environmental changes.
- Cope and stick joinery ensure precise corner detail.
- Meets or exceeds WDMA I.S. 6A industry standards for custom-grade interior doors.

Modern Plank Panel Doors

HINGES

Shown in Satin Nickel

Simonswerk®

TECTUS CONCEALED HINGES

Simonswerk Tectus concealed hinges offer a sleek, clean look perfect for today's modern interiors. These precision hinges are fully adjustable in three dimensions, making it simple to create a perfect margin between the door and frame.

Our concealed hinge offering is available on any of our 1-³/₄" or 2-¹/₄" thick doors and provides a complete solution: precision-machined door, fully prepped ready-to-assemble jamb and choice of Tectus hinges. Not available on pre-hung units.

Emtek®

SQUARE BARREL HINGES

Emtek square barrel hinges offer a unique, modern rectangular spine profile when the door is closed. With smooth action, a solid brass construction and loads of style, these hinges offer a sophisticated look and feel.

The hinge barrel also features no exposed screws for an aesthetically clean look, unlike some other options on the market.

Emtek square barrel hinges are available in 3-¹/₂" × 3-¹/₂", 4" × 4" and 4-¹/₂" × 4-¹/₂" sizes and are available in a wide variety of finishes.

Factory Pre-Hanging

Like our doors, TruStile's pre-hung units are built using premium construction techniques. Available as either pre-hung units or knock-down jambs, TruStile can supply any width and any species for any size door.

JAMBS

Modern Architectural Door Jambs

FOR TODAY'S DRYWALL TREATMENTS

The new TruStile modern casing-less door jamb configurations bring high-end, configurable designs that complete the look of modern openings in your projects. Discerning building professionals and their clients will appreciate the innovative options that create seamless lines and eliminate the need for casing around each door throughout the home.

The complete TruStile jamb offering is detailed in our *Interior Residential Jambs & Accessories Specification Guide*. Download for free at: www.trustile.com/jamb-guide

Projected Jamb with Inset Door

Exposed jamb edge projects from wall with inset door that is flush to wall

Jamb detail with L-bead trim and barrel hinge

Emtek square barrel hinges look great with this modern door and jamb, but most standard barrel hinges will work too.

Flush-to-Wall Jamb

Exposed jamb edge with door and jamb flush to wall

Jamb detail with Z-reveal trim and barrel hinge

Backside kerf requires minimum 1" thickness. Also available in single rabbet configuration.

Projected Jamb and Door

Exposed jamb edge projects from wall with door that sits flush to edge of jamb

Drywall Return Jamb

Semi-concealed jamb edge with door and jamb recessed in wall

Jamb detail with L-reveal trim and concealed hinge
Compatible with standard barrel hinges.

Jamb detail of drywall return jamb with concealed hinge
Compatible with standard barrel hinges. Jamb must be installed before applying drywall

Flush-to-Wall Jamb with Reveal

Exposed jamb edge with built-in reveal, door and jamb flush to wall

Jamb detail with L-bead trim and barrel hinge
Also available in single rabbet configuration.

Nutmeg finish and ¼" kerf cut reveals

WOOD ENTRY SYSTEMS

Make the entry to your home a most welcoming invitation with an exceptional entrance by TruStile. In collaboration with our parent company, Marvin®, we have engineered a family of premium entry systems that don't just transform a space, but how you feel inside it.

With the Reserve Wood Entry System™ and Resilient Wood Entry Systems™ you have two options that take exterior doors to the next level. The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable paint-grade construction without sacrificing any design options. The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

Both entry system solutions have been extensively tested and proven in partnership with the Marvin® Research and Development team.

MARVIN® 

For more information about our wood entry systems, to request your copy of our entry systems catalog,

www.trustile.com/entry

TruStile entry systems are solely available for residential applications.

TMIR1002-102B in walnut with Ebony finish and 1/4" kerf cut reveals

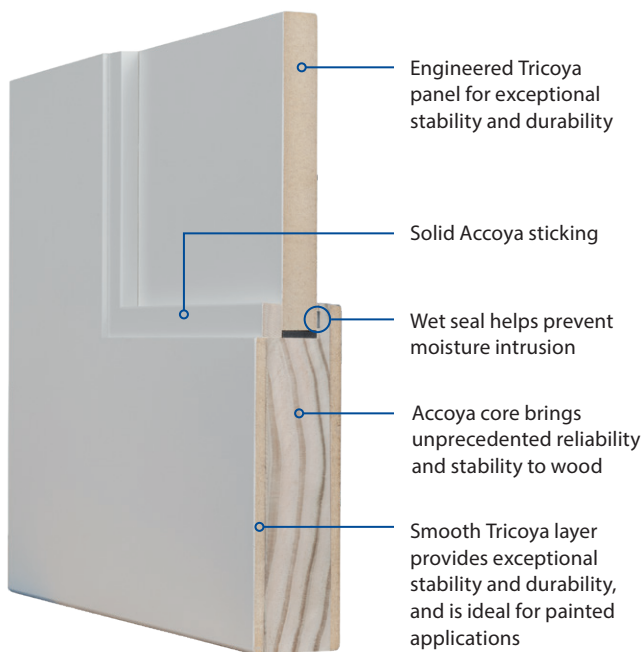

Reserve Wood Entry System™

The Reserve Wood Entry System elevates the refined elegance of your home with the beauty of stained natural wood.

- Engineered with a laminated veneer lumber (LVL) core and Tricoya® layers to provide exceptional stability and durability.
- 10 natural wood species available with an extensive collection of premium factory stain options.
- Premium appearance standards ensure industry-leading grain and color matching.
- 5-year limited warranty with industry standard overhang requirements for both inswing and outswing units.

TMIR4000-108A in Resilient engineered wood with 1/4" Kerf cut reveals

Resilient Wood Entry System™

The Resilient Wood Entry System sets the tone of quality for the whole home using the most durable painted construction without sacrificing any design options.

- Engineered with resilient Accoya®, an acetylated wood product, which brings unprecedented reliability and durability to wood.
- Tricoya® top layers provide exceptional stability, durability and paintability, for outdoor applications.
- Most configurations delivered pre-hung with an Accoya built jamb and a premium prime finish, ready to paint to match your design.
- 10-year warranty with limited and no-overhang applications, depending on system design specifications, for both inswing and outswing units.

DESIGN TOOLS

Design, Configure and Visualize Your Projects

Door Visualizer

Imagine the possibilities for your home with the TruStile Door Visualizer. Customize your door's style and materials and see changes in real-time.

Share a link to your configured door with others or download a PDF tear sheet, high resolution image or 3D model for use in modeling programs.

www.trustile.com/visualizer

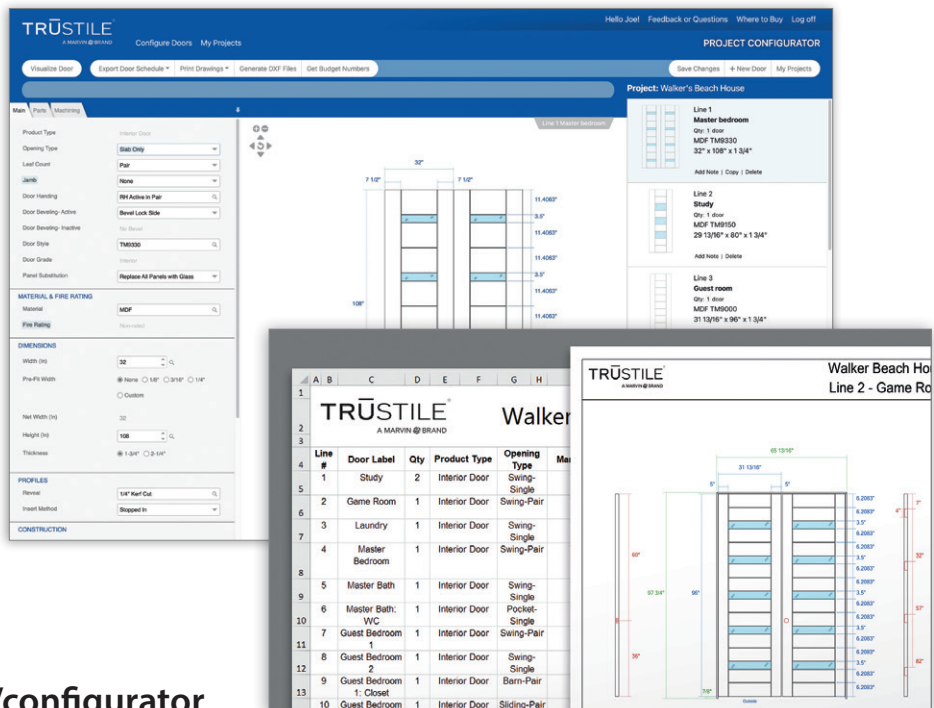

Project Configurator

Design your own door package. Specify the height, width and location of all components within a door and save to a project.

Project Configurator projects can be exported as a door schedule that opens directly in Microsoft® Excel, as a PDF of drawings or CAD models to import directly into your plans.
